Why Threat Intelligence?

%87

$4.45 million

Did you know that compromised accounts are 87% more likely to be exposed to phishing attacks? We live in a world where cyber threats are constantly evolving. The average cost of a data breach was $4.45 million in 2023. This is why you need to stay one step ahead with threat intelligence.
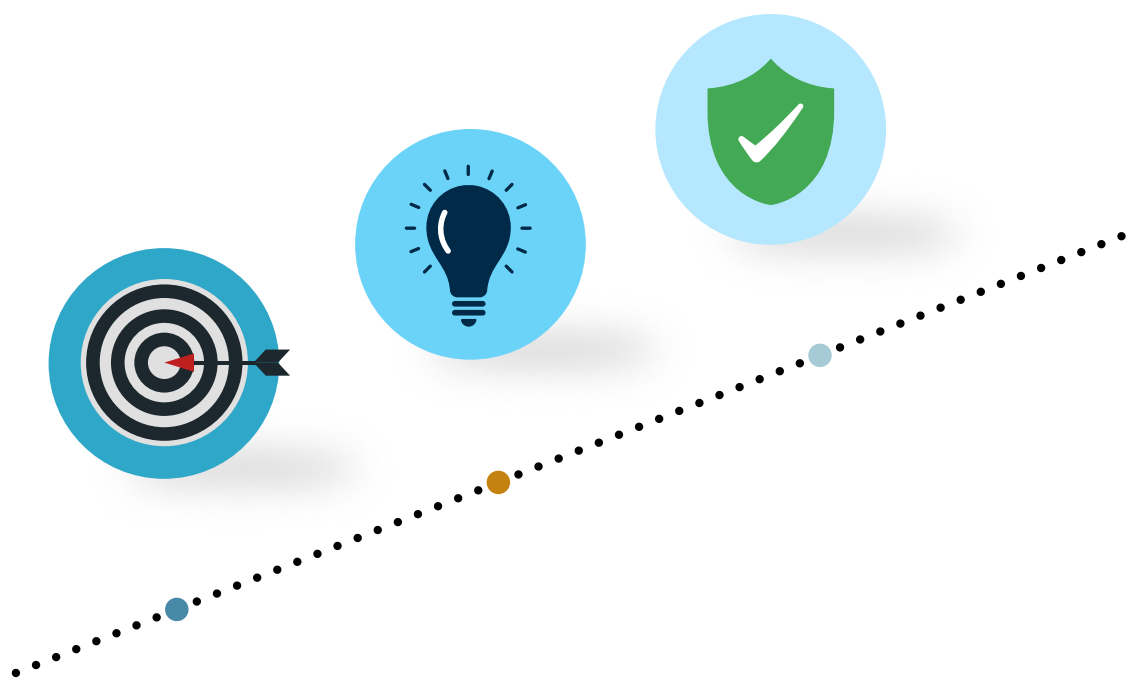

What is Threat Intelligence?

Imagine having a crystal ball that warns you about future cyber attacks. That's Threat Intelligence! It's all about understanding and predicting digital dangers before they happen.

Breached Accounts & Your Organization

Picture this - one of your employee's accounts gets hacked. This breach isn't just a problem for them; it can put your whole organization at risk. Shocking but true, a single compromised account can wreak havoc in no time!

Threat Intelligence in Action

Here's where Threat Intelligence shines. It identifies breached accounts, helps you understand the threats, and guides your actions to prevent, mitigate, or respond to breached accounts. Think of it like your personal cyber security guard!

A Proactive Approach with Threat Intelligence

After

Before

Prevention is better than cure, right? This is especially true in cybersecurity. A proactive approach with Threat Intelligence can nip cyber threats in the bud, saving you from potential headaches.

Use Keepnet Threat Sharing

Meet Keepnet's Threat Intelligence - your secret weapon in the war against cyber threats. Keepnet's unique features enable you to outsmart potential hackers and protect your digital world. With Keepnet, you're not just reacting to threats but predicting and preventing them!
